

# **Hygienekonzept**

## **by the Geisling Hurricanes**

(Version: 1.2020 from 2020-09-26)

### **Introduction:**

This Hygienekonzept is oriented by the regulations „Betriebliches Schutz- und Hygienekonzept“ from the Stadtwerke Erding Arena (icehall), dated on 17th of september 2020. It must be noted by each member of the icehockey-hobbyteam „Geisling Hurricanes“ as well as everyone, who wants to practice with us. Forward to the first participation in an event all teammembers will get a short verbal instruction and a copy of this Hygienekonzept. They have to affirm this by genuin signature.

To insure a regular practice and a permanently run of the icehall for the whole season it is important, that everyone follows the instructions of the icemasters, the coach (Stefan Tanzer) and/or the teamsters (Stephan Haldenwang, Matthias Mayrhofer). The icemasters or other personal of the icehall could make on-the-spot checks, whether we comply with the Hygienekonzept. If we diss it, we can be expelled from the icehall. An disqualification of the whole team for the rest of the season is possible, if we violet grossly or several times against the rules.

### **Universal safety- and hygiene-regulations**

- Persons, who will be tested positiv to Sars-CoV-2 (named as Covid-19 or Corona too) or have had contact to a Covid-19-infected person during the last 14 days, are expelled from our practices and they have to keep of the icehall at least for two weeks. The same obtains to people, who have constitutional clinic symptoms like heavy sniffles, dry coughing, constantly breathlessness, high temperature, etc. If a player shows such symptoms during the practice, he has to leave the icehall immediately.
- All have to mind a minimum distance of 1.5 meters to each other and to wear a mouth-nose-guard (mask) inside the icehall. This have the same status in the cabins, toilets and on the way to the ice rink. There is only an exception while exercising our sport on the ice rink (including players' bench and penalty box) as well as under the shower.
- The capacity of the cabins is severely restricted because of the distancing regulations. Therefore we have to limit the number of the participants to 20 players (incl. coach) plus 2 goalies each practice. For that reason it is crucial this year, that everyone registers himself in the "Kadermanager" reliably and timely (not later than Mondays at 12 o'clock) each time he joins a peactice. It could happen, that not registered members can not participate or have to change their clothes out of the icehall/cabin and can't take a shower after the practice.
- We have to enter the icehall as a group. The icemaster will pick us up at the entrance near the parking places 30 minutes before starting our practice and he will escort us to our cabins. Therefore we meet on the parking area ca. 35 minutes before starting our practice.

- The capacity of each cabin is written down on the outside of the respective door and is limited by the Stadtwerke like this:

cabins 2+3: together 21 people / cabins 4+5: 20 people / cabins 6+7: 23 people

The positions of the vacant seats (or else the clearances between the seats) are marked in the cabins, you have to consider this markings. We can shower in the icehall, but only two people contemporary and only at the not blocked showers (not marked with tape). You have to wear suitable shoes while showering and to use your own towel and showering foam. It's not allowed to share this things with an other person, the use of blow- or hair-dryers is forbidden too.

We don't have to leave the cabin while preparing the ice is not finished and after that we should go as a closure group to the ice rink. Drinking bottles have to be characterised and may be used only by his owner, it's not allowed to share them.

After the practice we have to make a coarse cleaning and disinfection of the cabin, toilet and shower by ourselves. The material and machines for this are provided by the operator of the icehall. The teamsters reserve for themselves to make a cleaning roster, if some guys think, they can duck out of their obligation. We have to leave the cabins within 45 minutes after the end of our practice, the exit of the icehall has at most to happen as a closure group.

- We have to record all members with their contact information every practice on the form given by the icemaster or another way. This report must be given back together with the keys of the cabins to the icemaster within 45 minutes after the practice by the teamster.

Therefore it is elementary to register in the Kadermanager timely by all members in front of each practice. Not in the Kadermanager registered persons (guest players) can only participant to our practices on rare occasions this season and have to give their contact information to the teamsters before the event. Ideally the member who wants to bring along a guest player informs early one of the teamsters by whatsapp, E-Mail or SMS and transmits simultaneous the contact information of the guest. Teammembers have always precedence to take part on a practice, the teamsters decree, if a guest could participant.
